Founding Story (Elevator Version)

Todd & Christen Frederickson started The Valley Clean Team in November 2022 with less than \$5,000 — no industry experience, a broken leg, a surprise layoff, and a newborn. They built every system they needed to scale to five markets and 200%+ revenue growth. Framework Systems exists because those systems worked, and every service business owner they talked to said: *"Can you build that for me?"*
